

CNIT 10 Grading Policy

Instructor

Sam Bowne

Web Site: samsclass.info

E-mail: sbowne@ccsf.edu

Grades

Your grade is determined by attendance at talks. There will be 6 talks during the semester.

Each CNIT 10 talk attended 10 points

Total (6 talks are expected) 60 points

Your final letter grade is determined from your total points as shown below:

<u>Points</u>	<u>Grade</u>	<u>P/NP Grade</u>
60 or more	A	P
50-59	B	P
40-49	C	P
30-39	D	NP
29 or less	F	NP

This course allows "Pass/No Pass" grading, if that option is requested before the deadline.

Extra Credit

Students can get extra credit by attending other IT professional training events, such as the RSA conference, B-Sides SF, Pacific IT Pros, Linux user's groups, Mac World, CES, etc. Each such event is worth 10 points, the same as the talks at CCSF.

Ethics and Cheating

Security professionals are held to high standards of ethics, like police officers. Lying, copying others' work and passing it off as your own, crude or abusive language, and performing cybercrimes will not be tolerated in this class. Offenders will be punished by losing points, or by immediate expulsion and a final grade of F, at the discretion of the instructor. If you are unsure whether something is unethical, please discuss it with your instructor before submitting questionable work for credit.

Students who demonstrate serious irresponsibility or immaturity may be expelled at any time.

Changes

I reserve the right to change any of these policies as necessary during the semester and will inform you of any changes.
